# Introduction

## The language

The language to be studied and assessed is the modern standard version of Indonesian.

## Scope of study

VCE Indonesian Second Language focuses on student participation in interpersonal communication, interpreting the language of other speakers, and presenting information and ideas in Indonesian on a range of themes and topics. Students develop and extend skills in listening, speaking, reading, writing and viewing in Indonesian in a range of contexts and develop cultural understanding in interpreting and creating language.

Students develop their understanding of the relationships between language and culture in new contexts and consider how these relationships shape communities. Throughout the study students are given opportunities to make connections and comparisons based on personal reflections about the role of language and culture in communication and in personal identity.

## Rationale

The study of Indonesian contributes to student personal development in a range of areas including communication skills, intercultural understanding, cognitive development, literacy and general knowledge. Learning and using an additional language encourages students to examine the influences on their perspectives and society, and to consider issues important for effective personal, social and international communication. It enables students to examine the nature of language, including their own, and the role of culture in language, communication and identity. By understanding the process of language learning, students can apply skills and knowledge to other contexts and languages. Learning a language engages analytical and reflective capabilities and enhances critical and creative thinking.

Indonesian is the national language of Indonesia. It is a standardised language that is the official language of government, education, business and the media. The Indonesian language is closely related to Malay and is understood in Malaysia and by Malay-speaking inhabitants of Singapore and Brunei. Indonesian is written using the Roman alphabet, and there is a clear correlation and a degree of consistency between its sound and its written form. It has been, and continues to be, shaped by other languages, most significantly Javanese, Dutch, Arabic and English. In addition to speaking Indonesian, many Indonesians will also use a local or regional language. Standard Indonesian can be different from the language people use everyday in informal situations.

The study of Indonesian provides students with the ability to understand and use a language that is spoken in a country that is one of Australia's closest neighbours, and is one of the most populous countries in the world.

The study of a specific language exposes students to different experiences and perspectives at a personal level. It encourages students to be open to different ways of thinking, acting and interacting in the world, even beyond the language being studied and their own language. A broad range of social, economic and vocational opportunities result from study in a second language. Students are able to engage with Indonesian-speaking communities in Australia and internationally in a variety of endeavours, including business, tourism and education.

## Aims

This study enables students to:

- communicate with others in Indonesian in interpersonal, interpretive and presentational contexts
- understand the relationship between language and culture
- compare cultures and languages and enhance intercultural awareness
- understand and appreciate the cultural contexts in which Indonesian is spoken
- learn about language as a system and themselves as language learners
- make connections between different languages, knowledge and ways of thinking
- become part of multilingual communities by applying language learning to social and leisure activities, life-long learning and the world of work.

## Structure

The study is made up of four units. Each unit deals with language and specific content contained in the areas of study and is designed to enable students to achieve a set of outcomes for that unit. Each outcome is described in terms of key knowledge and key skills.

## Entry

There are no prerequisites for entry to Units 1, 2 and 3. Students must undertake Unit 3 and Unit 4 as a sequence. Units 1 to 4 are designed to a standard equivalent to the final two years of secondary education. All VCE studies are benchmarked against comparable national and international curricula.

VCE Indonesian Second Language is designed for students who have typically studied the language for at least 200 hours prior to the commencement of Unit 1.

Entry to VCE Indonesian Second Language is governed by eligibility criteria which are published on the VCAA website and in the [VCE Administrative Handbook](#).

## Duration

Each unit involves at least 50 hours of scheduled classroom instruction.

## Changes to the study design

During its period of accreditation minor changes to the study will be announced in the [VCAA Bulletin](#). The Bulletin is the only source of changes to regulations and accredited studies. It is the responsibility of each VCE teacher to monitor changes or advice about VCE studies published in the Bulletin.

## Monitoring for quality

As part of ongoing monitoring and quality assurance, the VCAA will periodically undertake an audit of VCE Indonesian Second Language to ensure the study is being taught and assessed as accredited. The details of the audit procedures and requirements are published annually in the [VCE Administrative Handbook](#). Schools will be notified if they are required to submit material to be audited.

## Safety and wellbeing

It is the responsibility of the school to ensure that duty of care is exercised in relation to the health and safety of all students undertaking the study.

## Employability skills

This study offers a number of opportunities for students to develop employability skills. The *Advice for teachers* provides specific examples of how students can develop employability skills during learning activities and assessment tasks.

## Legislative compliance

When collecting and using information, the provisions of privacy and copyright legislation, such as the Victorian *Privacy and Data Protection Act 2014* and *Health Records Act 2001*, and the federal *Privacy Act 1988* and *Copyright Act 1968*, must be met.

# Assessment and reporting

## Satisfactory completion

The award of satisfactory completion for a unit is based on the teacher's decision that the student has demonstrated achievement of the set of outcomes specified for the unit. Demonstration of achievement of outcomes and satisfactory completion of a unit are determined by evidence gained through the assessment of a range of learning activities and tasks.

Teachers must develop courses that provide appropriate opportunities for students to demonstrate satisfactory achievement of outcomes.

The decision about satisfactory completion of a unit is distinct from the assessment of levels of achievement. Schools will report a student's result for each unit to the VCAA as S (Satisfactory) or N (Not Satisfactory).

## Levels of achievement

### Units 1 and 2

Procedures for the assessment of levels of achievement in Units 1 and 2 are a matter for school decision. Assessment of levels of achievement for these units will not be reported to the VCAA. Schools may choose to report levels of achievement using grades, descriptive statements or other indicators.

### Units 3 and 4

The VCAA specifies the assessment procedures for students undertaking scored assessment in Units 3 and 4. Designated assessment tasks are provided in the details for each unit in the VCE study design.

The student's level of achievement in Units 3 and 4 will be determined by School-assessed Coursework (SAC) as specified in the VCE study design and external assessment.

The VCAA will report the student's level of achievement on each assessment component as a grade from A+ to E or UG (ungraded). To receive a study score the student must achieve two or more graded assessments and receive S for both Units 3 and 4. The study score is reported on a scale of 0–50; it is a measure of how well the student performed in relation to all others who took the study. Teachers should refer to the current [VCE Administrative Handbook](#) for details on graded assessment and calculation of the study score. Percentage contributions to the study score in VCE Indonesian Second Language are as follows:

- Unit 3 School-assessed Coursework: 25 per cent
- Unit 4 School-assessed Coursework: 25 per cent
- Examinations\*: oral component and written component: 50 per cent.

Details of the assessment program are described in the sections on Units 3 and 4 in this study design.

## Authentication

Work related to the outcomes of each unit will be accepted only if the teacher can attest that, to the best of their knowledge, all unacknowledged work is the student's own. Teachers need to refer to the current [VCE Administrative Handbook](#) for authentication procedures.

---

\* A single grade is awarded.

# Cross-study specifications

For the purposes of this study the following specifications apply across all units. Details of the scope of each specification are provided in the unit overviews and in the introduction to the relevant areas of study.

Themes and topics are prescribed and create a framework of content for the activities and tasks that students undertake for the areas of study in each unit. Language content suited to the level and scope of the themes and topics is also specified and includes grammar, text types and writing styles that students are expected to be familiar with by the end of Unit 4. There is no prescribed order in which this learning should occur.

## Communicating and understanding languages and cultures

VCE language study is underpinned by the concepts of communicating and understanding languages and cultures. There are five macro skills that inform all language use: listening, speaking, reading, writing and viewing. Connections, comparisons and communities provide the context for learning each specific language while the interpersonal, interpretive and presentational contexts define the ways in which students use the language they are studying. The integration of these contexts through the teaching and learning program enables students to develop their understanding and skills in the language.

### Communicating

VCE Indonesian Second Language requires communication in Indonesian in a variety of situations and for multiple purposes. These purposes include socialising, exchanging information, creating texts, interpreting from one language to another and reflecting on language experiences to improve communication in the future.

#### Interpersonal communication

Interpersonal communication requires interaction with other speakers of the language in oral or written form. Information is exchanged in a manner that is accessible to others, offers coherent views and stimulates reasoned responses in Indonesian in a range of contexts.

Interactions will relate to the themes and topics selected for the unit and may include text types such as a conversation, email exchange, letter, participation in a debate, telephone call, text message or discussion.

## Interpretive communication

Interpretive communication requires the location, interpretation and analysis of information obtained in Indonesian. The content is drawn from the themes and topics selected for the unit and includes listening and reading texts and may include visual materials that reflect some aspect of language or culture.

## Presentational communication

Content related to the themes and topics selected for the unit is presented to a specified audience in oral or written form in Indonesian, and may include visual, movement or musical elements. In Units 1 and 2, the presentation focus is on introducing cultural aspects associated with Indonesian-speaking communities to a specific audience, through narration, recounting and explaining in an informative and engaging way. In Units 3 and 4, the focus is on integrating concepts, information and ideas from a range of sources, and presenting them to persuade an audience, to reflect and express ideas, explain a point of view or evaluate information.

## Understanding languages and cultures

Understanding languages and cultures requires an investigation of the roles of language and culture in shaping meaning and reflection on the practices, cultural products and perspectives of the cultures of Indonesian-speaking communities.

## Connections

The study of any language provides access to additional information on new and familiar topics, including those of immediate interest and relevance to students. Within the themes and topics selected for each unit, students are encouraged to draw on perspectives and ways of thinking and acting in the world which complement what they have learned in their own language from other disciplines, research or informal sources.

Intercultural awareness requires students to reflect on the ways that culture influences how language is used and received. Students consider the process of learning another language, investigating another culture or participating as a global citizen in areas such as travel, tourism, work, economic activity or research.

## Comparisons

Comparisons are undertaken between Indonesian and other languages, including English, to reflect on the dynamic nature of language, the notion of language as a system, limitations on equivalence between languages and the interplay between language, culture and the individual.

Language is used to reflect on and explain the similarities and differences between the cultures studied and the student's own culture/s.

## Communities

Within the themes and topics selected for each unit, students investigate a variety of cultural products and practices and their use or role in Indonesian-speaking communities. Cultural products or practices can be drawn from a diverse range of texts, activities and creations. These may include the following: stories, poems, plays, novels, songs, films, photographs, artworks, architecture, technology, food, clothing, sports and festivals. Students identify aspects of cultural products or practices that originate in or are influenced by the language and cultures of Indonesian-speaking communities in their own lives.

# Prescribed themes and topics

There are three prescribed themes for study in VCE Indonesian Second Language:

- The individual
- The Indonesian-speaking communities
- The world around us

These themes have a number of prescribed topics and suggested subtopics.

All the themes and topics are to be studied over the course of Units 1–4. The order in which the themes and topics are studied is not prescribed; teachers may choose which themes and topics are studied for each unit.

In each unit, the learning program will include topics from more than one theme and at least one topic and subtopic for each area of study. The subtopic will provide the context for teaching, learning and assessment of achievement.

Consideration should be given to the appropriateness of topics and subtopics in terms of creating logically sequenced language skill development and for the depth of study required in each unit. It is not expected that all topics will require the same amount of study time and some may be more suited to Units 1 and 2 or to Units 3 and 4, depending on the learning program.

## Text types

Students come into contact with a wide range of texts when undertaking VCE Indonesian Second Language and practise listening, speaking, reading, writing and viewing skills through texts of all types. The texts used by students to practise receptive language skills (listening, reading and viewing) should be chosen for their suitability to develop student learning in the selected subtopics for each unit. The demands on students are greater when producing original texts (spoken or written). Productive activities must be appropriate to the level of language learning of the students. For the purpose of this study, viewed texts may include photographs, pictures, posters, films or film clips, captioned illustrations or maps related to the subtopic. It is important that students have an awareness of the features, context, purpose and audience of each text used and the text type in general.

The text types that students can reasonably be expected to produce by the completion of this study include:

Article	Interview	Role-play
Blog	Letter (formal or informal)	Script of a play
Brochure/Leaflet	Report	Script of a speech or talk
Diary/journal entry	Review	Story
Email		

## Writing styles

Students are expected to be able to produce different styles of writing. Writing styles include: personal, imaginative, persuasive, informative and evaluative.

While students need to be aware of the general features of the writing styles, teaching and learning activities should clearly define the context, purpose and audience to provide direction for students on managing the writing style required for each activity.

# Unit 1

In this unit students develop an understanding of the language and culture/s of Indonesian-speaking communities through the study of three or more topics from the prescribed themes listed on page 11. Each area of study in the unit must focus on a different subtopic. Students access and share useful information on the topics and subtopics through Indonesian and consolidate and extend vocabulary and grammar knowledge and language skills. They focus on analysing cultural products or practices including visual, spoken or written texts.

Cultural products or practices can be drawn from a diverse range of texts, activities and creations. These may include the following: stories, poems, plays, novels, songs, films, photographs, artworks, architecture, technology, food, clothing, sports and festivals. Students apply acquired knowledge of Indonesian culture and language to new contexts.

Students reflect on the interplay between language and culture, and its impact on the individual's language use in specific contexts and for specific audiences.

The cross-study specifications common to Units 1–4 are detailed on pages 9–10 of this study design.

### Outcome 1

On completion of this unit the student should be able to exchange meaning in a spoken interaction in Indonesian.

To achieve this outcome the student will draw on key knowledge and key skills outlined in Area of Study 1.

#### Key knowledge

- ideas and concepts related to the selected subtopic
- vocabulary and grammar suitable for exchanging information on the selected subtopic
- oral language for participating in an informal, personal, spoken interaction in Indonesian, including idioms
- language and behaviours required to effectively initiate, maintain and close a spoken exchange
- a range of expectations of the participants in the spoken interaction, depending on age, status and other relevant considerations.

#### Key skills

- discuss the selected subtopic
- link and sequence ideas and information
- recognise and respond to cues for turn-taking

In this area of study students locate and use information from two texts in Indonesian, chosen from a written, spoken or audiovisual format. They develop skills and knowledge to read, listen to or view texts in Indonesian effectively, to summarise content and to combine information from the texts in written responses in Indonesian and English. The subtopic selected for the texts will be drawn from the prescribed themes and topics and should provide an opportunity for students to learn about the culture/s of the Indonesian-speaking communities.

In preparation for understanding and interpreting information on the selected subtopic, students consider relevant content, language and cultural information. They focus on language important for presenting information in written form, such as answering questions or writing for a specific purpose and audience. Students identify and clarify aspects of language and culture in the texts.

### Outcome 2

On completion of this unit the student should be able to interpret information from two texts on the same subtopic presented in Indonesian, and respond in writing in Indonesian and in English.

To achieve this outcome the student will draw on key knowledge and key skills outlined in Area of Study 2.

#### Key knowledge

- ideas and concepts related to the selected subtopic
- vocabulary and grammar suitable for understanding, interpreting and conveying information on the subtopic
- conventions of text types and language for relaying information in writing.

#### Key skills

- use suitable written Indonesian for the purposes of the text type, such as levels of formality or abbreviated language
- use appropriate spelling, grammar, layout and punctuation
- self-correct language use as appropriate.

## Area of Study 3

### Presentational communication

Students present content related to the selected subtopic in Indonesian in written form, which may include supporting visual elements. Students develop a presentation that recounts, narrates, entertains, retells or interprets information, concepts and ideas for a specific audience.

The presentation will feature cultural products or practices from Indonesian-speaking communities which can be drawn from a diverse range of texts, activities and creations.

## Assessment

The award of satisfactory completion for a unit is based on whether the student has demonstrated the set of outcomes specified for the unit. Teachers should use a variety of learning activities and assessment tasks that provide a range of opportunities for students to demonstrate the key knowledge and key skills in the outcomes.
